## SSL Server Test: www.faalangstonderstudenten.duckdns.org (Powered by Qualys SSL Labs) **Handshake Simulation** -# Not simulated clients (Protocol mismatch) IE 6 / XP No FS 1 No SNI 2 Protocol mismatch (not simulated) (1) Clients that do not support Forward Secrecy (FS) are excluded when determining support for it. (2) No support for virtual SSL hosting (SNI). Connects to the default site if the server uses SNI. (3) Only first connection attempt simulated. Browsers sometimes retry with a lower protocol version. (R) Denotes a reference browser or client, with which we expect better effective security. (All) We use defaults, but some platforms do not use their best protocols and features (e.g., Java 6 & 7, older IE). (All) Certificate trust is not checked in handshake simulation, we only perform TLS handshake. **Protocol Details** No, server keys and hostname not seen elsewhere with SSLv2 (1) For a better understanding of this test, please read this longer explanation DROWN (2) Key usage data kindly provided by the $\underline{\text{Censys}}$ network search engine; original DROWN website $\underline{\text{here}}$ (3) Censys data is only indicative of possible key and certificate reuse; possibly out-of-date and not complete Secure Renegotiation Supported Secure Client-Initiated Renegotiation No Insecure Client-Initiated Renegotiation No BEAST attack Not mitigated server-side ( $\underline{\text{more info}}$ ) TLS 1.0: 0xc013 POODLE (SSLv3) No, SSL 3 not supported (more info) POODLE (TLS) No (more info) Zombie POODLE No (more info) TLS 1.2: 0xc027 GOLDENDOODLE No (more info) TLS 1.2: 0xc027 OpenSSL 0-Length No (more info) TLS 1.2: 0xc027 Sleeping POODLE No (more info) TLS 1.2: 0xc027 Yes, TLS FALLBACK SCSV supported (more info) Downgrade attack prevention SSL/TLS compression No Heartbeat (extension) No Heartbleed (vulnerability) No (more info) Ticketbleed (vulnerability) No (more info) OpenSSL CCS vuln.
